Weighted National average price/50 Kgs bag (Auction +Direct Sales) in US Dollars	210	238.12
Ratio of Estate: Smallholder production	29:71	29:71
Number of active co-operatives/factories	605/1,122	682/1,176
Number of active estates	2,749	2,764

DEFINITION OF TERMS

Auction: The system under which clean coffee is offered for sale at a coffee exchange

Clean coffee: coffee bean or dried seed of the coffee plant separated from non-food tissues of the coffee fruit where the silver skin is reduced to the maximum possible extent

Coffee: means the plant botanically known as coffee species (L.) and includes the fruit, whether on the plant or detached therefrom, the seed in form of either buni, parchment coffee, clean coffee, roasted beans or ground coffee

Direct sale: a contractual arrangement between a grower (a co-operative society, society, union, grower-miller, estate or an association of coffee growers) and an overseas buyer or local roaster for the sale of own clean coffee based on mutually accepted terms and conditions enforceable in law

Estates: an area of land or group of parcels of land under coffee not being less than five acres in size in aggregate or land under coffee which has an average annual production of not less than twenty thousand kilograms of cherry over a period of three years

Grower: means any person who cultivates coffee in Kenya and may for purposes of licensing, include; co-operative societies, unions, associations and estates

FOREWORD

Agriculture and Food Authority (AFA) - Coffee Directorate is mandated to develop, promote, and regulate Kenya's coffee industry. According to the Crops (Coffee) (General) Regulations, 2019, Article 4 (2) (e), the Directorate is responsible for collecting, collating, maintaining a database, and disseminating information about the coffee industry. Each year, AFA – Coffee Directorate publishes the Year Book to disseminate information across the entire value chain.

This publication serves as a valuable resource for all stakeholders in the coffee industry, reflecting the Directorate's efforts in consulting and engaging with various industry players to enrich the industry's database and foster data driven decision making for the government as well as the industry stakeholders.

We extend our gratitude to the National Government, County Governments, Kenya Agriculture and Livestock Research Organization - Coffee Research Institute (CRI), Kenyan universities, Nairobi Coffee Exchange (NCE), Kenya Trade Network Agency (KenTrade), growers, millers, brokers, buyers, coffee agents, roasters and all other players in the coffee value chain for their invaluable support during the data collection, collation and validation processes. Their contributions have significantly enhanced the quality and content of this annual publication.

On behalf of the Agriculture and Food Authority, I would like to express my appreciation to AFA staff and all stakeholders who made this publication possible. We hope that readers will find this Year Book highly informative.

Dr. Bruno Linyiru, OGW
Director General – Agriculture and Food Authority

ACKNOWLEDGEMENTS

I would like to extend my heartfelt thanks to all the coffee value chain players for their unwavering support and cooperation during the data collection for the Coffee Year Book 2023/2024. I also wish to acknowledge the invaluable role played by the Director General – Agriculture and Food Authority in making this publication possible.

Additionally, I recognize the critical contributions of all Coffee Directorate technical staff during the data collection exercise and validation workshop, which were instrumental in the successful publication of this yearbook. My sincere gratitude goes to the Deputy Director of the Market Research and Product Development Department, Ms. Josephine Simiyu, for coordinating the collection, analysis, and compilation of the coffee value chain data. Special thanks to the Directorate's Statistician, Mr. Calvin Baraka, for his work in analyzing the data and compiling the report, and to the Technical and Advisory department, especially the regional staff, for collecting and collating the production data.

We want to convey our sincere gratitude to our partners: The Coffee Research Institute for providing production cost data and seed and seedling data, The Nairobi Coffee Exchange for providing the auction statistics, The State Department for Agriculture, the Council of Governors, and the Kenya Trade Network Agency for contributing to the data validation. Not forgetting the editorial team comprising the three technical departments of the directorate, whose efforts have been invaluable. I hope this publication will serve as an invaluable resource to foster data-driven decision-making in the coffee sub-sector.

Mr. Felix Mutwiri
Ag. Director, Coffee Directorate

Figure 2: Coffee Growing Regions

INTRODUCTION

INTRODUCTION

The coffee sub-sector in Kenya continues to record steady growth as the government's efforts to rejuvenate the sector continue to positively affect the industry. In the 2023/2024 season, increases in production, exports, and overall market value were recorded. National clean coffee production rose by 1.7% to 49,501 metric tons (MT) from 48,648 MT the previous year, driven by expanded cultivation areas and improved yields. Production of coffee similarly increased for each producing unit with estates producing 14,559 MT and smallholder societies contributing 34,943 MT.

Farmers realized improved earnings, with the national weighted average cherry payout increasing from KES 71.97/kg to KES 81.05/kg. The improved rate is attributed to support from the government and sub-sector actors. The highest cherry rate was recorded at Njuriga FCS – Gakoe Factory in Nyeri County at KES 130/kg. The total value of coffee produced was USD 229.55 million (KES 31.31 billion) which is an increase from USD 204.53 million (KES 24.65 billion) in 2022/2023. With the rise in global coffee prices, it is expected that the transmission of the global prices into the local market will continue into the 2024/2025 season promising even higher prices.

At the Nairobi Coffee Exchange (NCE), trading volumes increased to 41,617 MT (676,903 bags), generating a total value of USD 189.29 million up from USD 127.86 million at an improved average price of USD 227.42 per 50-kg bag which was 16% higher as compared USD 195.79 recorded in the 2022/2023 season.

In the 2023/2024 coffee year, farmers embraced direct coffee sales trading to a tune of 6,583.42 MT with a corresponding value of USD 40.36 million (KES 5.49 billion). Direct sales, while lower in volume as compared to the auction, averaged USD 305.78 per 50-kg bag which was 34% higher as compared to the average auction price in line with the direct sales guidelines. This follows efforts by the Directorate to sensitize growers on contract negotiation, price discovery and other related thematic areas surrounding coffee exports.

The growth in all other areas was also mirrored in the export market, where Kenya exported 49,199 MT of coffee which is an increase from 47,957 MT the previous coffee year. A positive correlation was also observed in the value of exports where the value increased from USD 252.12 million (KES 34.11 billion) to USD 292.88 million (KES 39.95 billion). The average export price per 60-kg bag also rose from USD 315.44 to USD 357.18 an increase by 13%. The United States, Germany, Belgium, Sweden, and South Korea remained Kenya's top five coffee export destinations, with Belgium leading with 118,305 bags (16%).

PRODUCTION AND PROCESSING

PRODUCTION AND PROCESSING

Coffee production in Kenya is undertaken under two main categories of cooperatives and estates. In cooperatives comprising of smallholder farmers, coffee is aggregated into three form namely; cherry, buni, and parchment. Smallholder farmers deliver their coffee to factories, where they are compensated based on the amount and net value of the coffee sold. Cherry payment rates are specific to smallholder farmers and do not apply to estate farmers.

GROWERS DISTRIBUTION BY COUNTY (COOPERATIVES AND ESTATES) – 2023/2024

During the coffee year under review, 682 cooperatives and 1,176 factories were active compared to 627 cooperatives and 1,122 factories in 2022/2023. The number of active estates increased from 2,749 in 2022/2023 to 2,764 in 2023/2024. Table 1 shows the distribution of growers across the counties during the year under review.

SEEDLING DISTRIBUTION 2023/2024 - By Coffee Research Institute

SEEDLING DISTRIBUTION 2023/2024 - By Coffee Research Institute

Seed and seedling distribution by Coffee Research Institute (CRI) for the 2023/2024 coffee year amounted to a total of 5,332 Kgs of seed and 153,087 seedlings. SL 34 seeds were the most bought with a percentage share of 34% followed by Batian and SL 28 with 29% and 21% respectively.

In terms of seedlings sold, 69% of total seedlings sold were of the Ruiru 11 variety while 22% were of the Batian variety, 13% SL 28 and 1% SL 34 as highlighted in Table 2

Table 2: Seed and Seedling Distribution by CRI

Variety	Seeds (Kgs)	% Distribution	Seedlings	% Distribution
Batian	1,548	29%	32,952	22%
Ruiru 11	281	5%	96,927	63%
SL 28	1,137	21%	20,631	13%
SL 34	1,816	34%	2,277	1%

SEEDS AND SEEDLINGS DISTRIBUTION BY COUNTY – IMPROVED VARIETIES

Table 3 highlights the seeds and seedlings distributed by the Coffee Research Institute (CRI) per county for the improved coffee varieties namely; Batian and Ruiru 11. The highest percentage of seeds were distributed to Nandi county accounting for 20% of the total volume. The bulk of the seeds were distributed in the West of Rift with the top 5 counties being Nandi, Uasin Gishu, Kericho, Baringo and Bungoma amounting to 64% of the total seeds distributed by CRI in the 2023/2024 coffee season.

Table 3: Seed Distribution by County – Batian & Ruiru 11

County	Batian		Ruiru 11 Total		Total Seeds (Kgs)	Share

The large amount of seeds distributed in the West of Rift is consistent with the expansion of coffee farming in the region. The government is focusing on expanding of Robusta farming in the low altitude counties in a bid to boost coffee production volumes.

AREA UNDER COFFEE 2023/2024

AREA UNDER COFFEE 2023/2024

The total area under coffee rose from 111,902 Ha in 2022/2023 to 113,501 Ha in 2023/2024 translating to an increase of 1.4 percent (1,599 Ha). The area under smallholder farmers expanded from 84,744 Ha in 2022/2023 to the current 84,950 Ha. The total area under estates also increased from 26,964 Ha in 2022/2023 to 28,552 Ha in 2023/2024. Table 4 illustrates how the area planted with coffee was distributed based on the grower type and county.

Table 4: Area under production per grower category

No.	County	Estate (Ha)	Cooperatives (Ha)	Total	Share

As highlighted in Figure 3, all regions recorded an increase in acreage while Kiambu and Murang'a experienced a decline in expansion

CHANGE IN COFFEE CULTIVATION AREA BY COUNTY

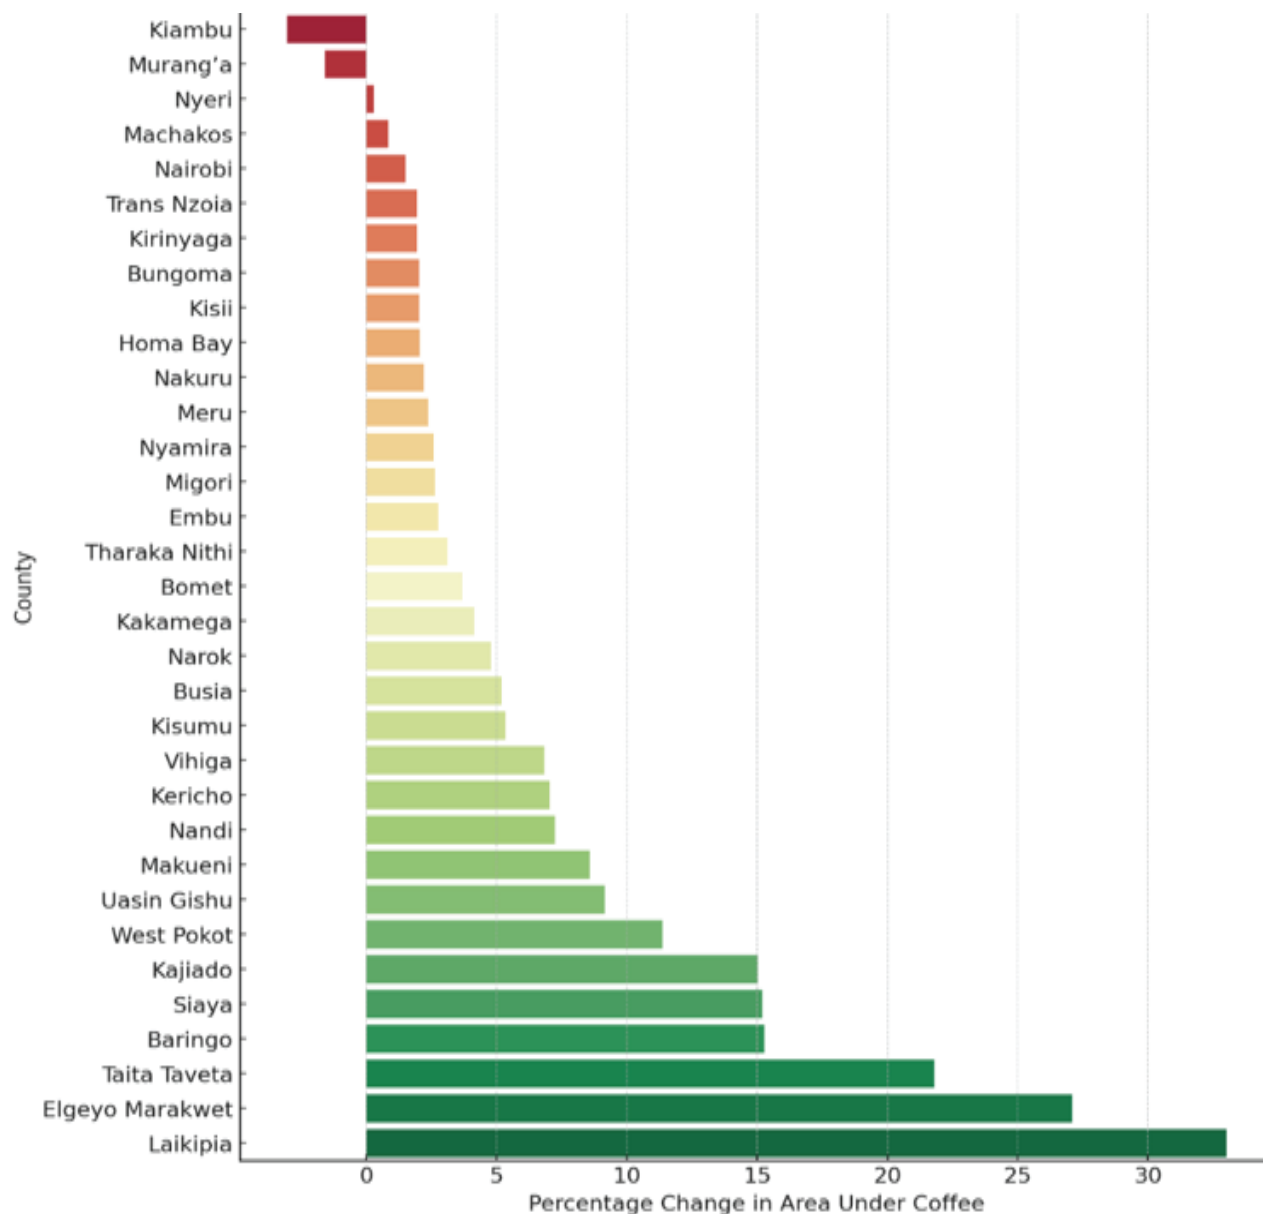

Figure 3: Percent change in area for 2023/2024 compared to 2022/2023

CHERRY, BUNI AND PARCHMENT PRODUCTION 2023/2024

CHERRY, BUNI AND PARCHMENT PRODUCTION 2023/2024

The country has regions with two distinct seasons and regions with one season based on the weather pattern. The flowering periods are September/October for the early crop and February/March for the late crop. The harvesting periods are April to July for the early crop and September to December for the late crop.

In the coffee year under review, cooperative societies produced a total of 220.10 million Kgs of cherry, 5.4 million Kgs of buni and 354,227 kgs of parchment. In comparison with the previous coffee year, the cherry and parchment production increased by 2% and 18% from 215.39 million Kgs and 299,256 Kgs respectively while buni production reduced by 27% from 7.4 million.

Table 5 further illustrates the segmentation of production per county.

Table 5: Coffee Production per County for Cooperatives (Cherry, Buni & Parchment)

No.	County	Cherry (Kgs)	Buni (Kgs)	Parchment (Kgs)	% Share Cherry Produced

Total		220,103,885	5,395,949	354,227	100.00%

In the East of Rift, the highest cherry producing county was Kirinyaga, followed by Nyeri and Murang'a representing 22%, 15% and 14% respectively while in the West of Rift, Kericho, Bungoma and Nandi were the leading counties representing 7%, 6% and 4% respectively.

Parchment processing at Sakami Estate

PAYMENT RATES

The average payment rate for cherry during the year 2023/2024 coffee year was KES 81.05 by excluding non-cherry producing counties, for Buni was KES 191.03 and for parchment was KES 362.10 as shown in Table 6. In comparison to the 2022/2023 coffee year, both cherry and parchment recorded increases of 13% and 2% from KES 71.97 and 354.10 respectively while the average rate from buni declined by 1% from KES 191.03.

Table 6: Average payment rate per category of coffee delivered

Producing Counties	Average cherry rate (KES)	Average Buni rate (KES)	Average parchment rate (KES)
Average payment rate	81.05	191.03	362.10

Table 7 illustrates the highest payment rates per county. Gakoe factory of Njuriga FCS paid the highest with pay out rate of KES 130 while the highest payout rate for parchment was KES 450 for Turbo FCS in Uasin Gishu.

CLEAN COFFEE PRODUCTION

CLEAN COFFEE PRODUCTION

COFFEE MILLING 2023/3024

A total of 49,501.22 MT was produced in the 2023/24 coffee year which was an increase by 2% as compared to the 48,648.54 MT produced in the 2022/23 coffee year as shown in Figure 4.

CLEAN COFFEE PRODUCTION (MT) - 10 YEARS

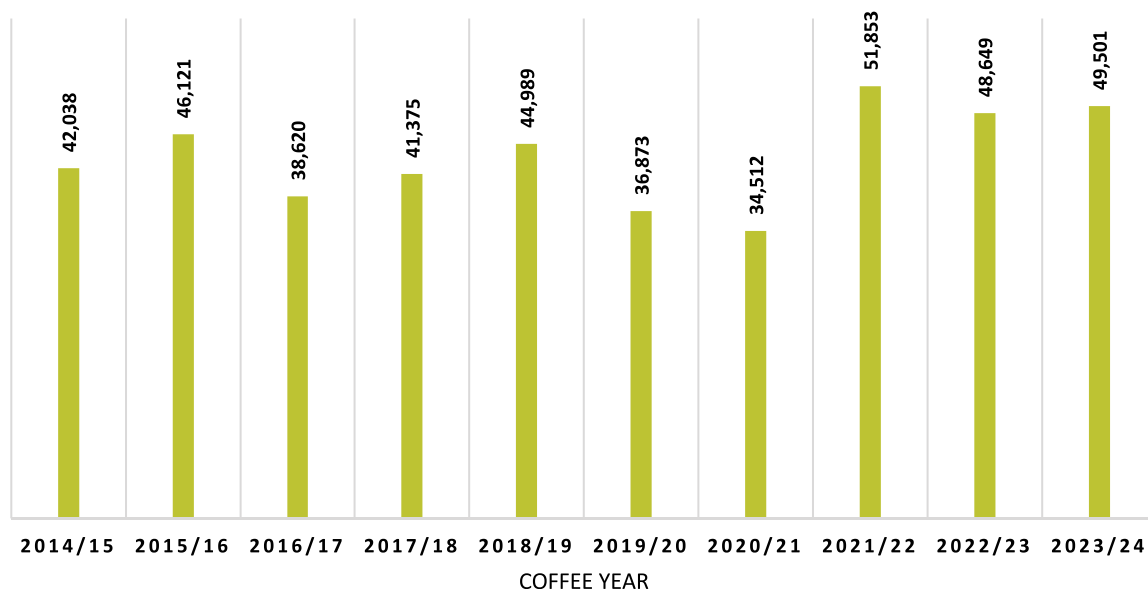

Figure 4: Ten-year Trend of Clean Coffee Production 2014/2015 – 2023/2024

In 2023/2024, coffee milling was undertaken by 28 active mills as shown on Table 8. The milling companies in the 2023/24 season was a mix of private mills, union mills and grower mills. The top 3 millers for the 2023/24 season were NKPCU Sagana (15.85%), NKPCU Dandora (15.56%) and Kirinyaga Union County Coffee Mill (10.79%).

CLEAN COFFEE PRODUCTION BY REGION AND COUNTY

Clean coffee production in Kenya is mainly segmented into two regions namely; East and West of Rift. Coffee production has predominantly been done in the East however, the recent trends shows an increasing production in the West of Rift due to adoption of coffee farming technologies.

Table 9: Clean Coffee Production by Region 2022/2023 & 2023/2024

Region/Grower Category	Estate (MT)		Cooperatives (MT)		Total (MT)		% Share
	2022/2023	2023/2024	2022/2023	2023/2024	2022/2023	2023/2024	
East of Rift	10,746.19	10,655.21	25,036.00	25,507.75	35,782.21	36,162.96	10,746.19
West of Rift	3,414.25	3,971.05	9,452.09	9,367.22	12,866.35	13,338.27	3,414.25
Total	14,160.45	14,626.26	34,488.09	34,874.97	48,648.54	49,501.22	14,160.45
Percentage	29.11%	29.55%	70.89%	70.45%	100.00%	100.00%	29.11%

Table 9 highlights the production by region across the 2022/2023 coffee year and the 2023/2024 coffee year. There was an increase in production across both regions in the 2023/2024 season as compared to the previous year. Figure 5 below further highlights the production distribution across the East and West of Rift in the 2023/2024 season.

REGIONAL PRODUCTION EAST AND WEST OF RIFT 2023/2024

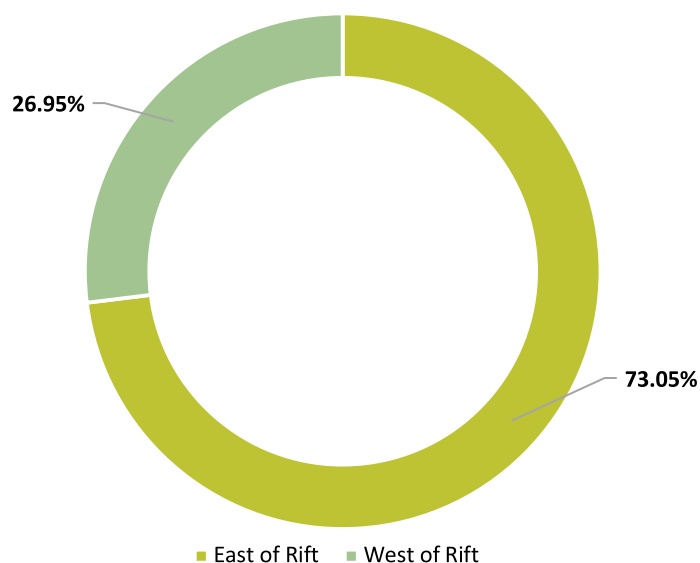

Figure 5: Distribution of Clean Coffee Production by Region

In the East of Rift, Kiambu county had the highest production with a share of 18.10% followed by Kirinyaga (18.04%) and Nyeri (13.17%) while in the West of Rift the highest producing counties in the were Kericho (9.79%), Bungoma (4.77%) and Nandi (3.65%).

CROP FORECAST

The crop forecast is based on factors that include analysis of production trends, weather patterns and their impact on coffee, scientific estimates from the bearing crop, visual observations of crop status, and feedback from coffee growers and millers.

Table 11: Crop Forecast 2024/2025

Total		15,301	37,160	52,461

Table 11 shows that during the year 2024/2025, the production level is expected to increase to 52,461 MT of clean coffee, marking a 6% increase compared to 2023/2024. The favorable weather during the 2024/2025 coffee year, characterized by adequate rains, resulted in good flowering and a heavy crop. Additionally, the expansion of coffee-growing areas, particularly in the North Rift region, will contribute to the increase. The government's Cherry Revolving Fund, administered through NKPCU, has facilitated timely access to farm inputs by growers.

Coffee Producing Counties and Production Intensity for 2023/2024

A photograph showing the coffee processing stage of drying. In the foreground, a large, conical pile of a yellow burlap bag sits on a raised bed covered with a thick layer of red coffee beans. The beans are spread out on similar raised beds in the background, where a person in an orange shirt is visible working. The scene is set outdoors in a rural area with trees and hills in the distance. A large yellow abstract shape is on the left side of the image.

COFFEE PROCESSING METHODS

COFFEE PROCESSING METHODS

Coffee processing denotes the transformation of cherries into green coffee beans that can be roasted and brewed. The quality of coffee starts at the farm level with good agricultural practices, cherry picking at the right stage and time and employing processing techniques/methods that bring out its distinctive character and taste. The common methods of processing coffee in Kenya are; wet processing, dry processing (buni), natural processing and honey processing each producing unique characteristics.

Other emerging methods of processing that are being adopted include; anaerobic fermentation and naturals. Coffee processed using these techniques are destined for niche markets often fetching premium prices. Table 12 describes the steps of various coffee processing methods and the specific flavor profiles.

Processing Method	Images	Process	Flavour Profiles
Washed		Harvesting and Sorting: Ripe coffee cherries are harvested from coffee trees. After the harvest, the cherries are sorted to remove damaged and separate ripe cherries from unripe cherries. Pulping: The harvested cherries are then de pulped. This means the outer layer of the coffee cherry is removed. The coffee beans are left with a layer of mucilage which is important for a coffee's natural sweetness. Fermentation: During the next step, the coffee beans are fermented in a fermentation tank. This fermentation process helps to break down the mucilage. How long the beans are fermented differs from farm to farm, but the minimum is one or two days. Different countries use slightly different methods for this step.	Clean, bright acidity, floral and fruity notes to more nuanced undertones like caramel, chocolate, or even herbal elements.

Figure 7: Coffee Pulping

Processing Method	Images	Process	Flavour Profiles
		Washing: After fermentation, the beans are washed in a water tank. The washing process is often repeated multiple times until the coffee farmers are satisfied. Drying phase: After washing, the coffee beans are spread out in thin layers to dry evenly on raised beds. The drying process can occur naturally under the sun or with mechanical dryers. On some farms, beans dry naturally for a few days and then go into a mechanical dryer.	
Honey Processing		Harvesting red ripe cherries. Pulping, like the pulped natural process, the outer skin is removed but some or all of the mucilage is left on the skin Drying the beans with mucilage in the sun or using mechanical dryers. The amount of mucilage left can vary e.g. white honey, yellow honey and red honey. Milling, to remove the remaining mucilage. The first variant, Yellow Honey derived is by leaving the coffee beans to dry uncovered, for a week. This produces light bodied, floral and fruity coffee. Red Honey is obtained through the same process but longer, by a week. This results in sweet and syrupy tones in the coffee. Black Honey is acquired by leaving the beans to dry covered, for a 2 to 3 weeks. The beans produce full-bodied, sweet and fruity coffee.	Flavour varies depending on the mucilage left on the beans; • Sweeter profile • Less acidic less dry and sparkly • More Body – feels heavier on the tongue • Cleaner mouth feels. • Notes of chocolate, brown sugar, spice & cedarwood. • More balanced flavours and aroma are not overwhelming; spread evenly on the tongue

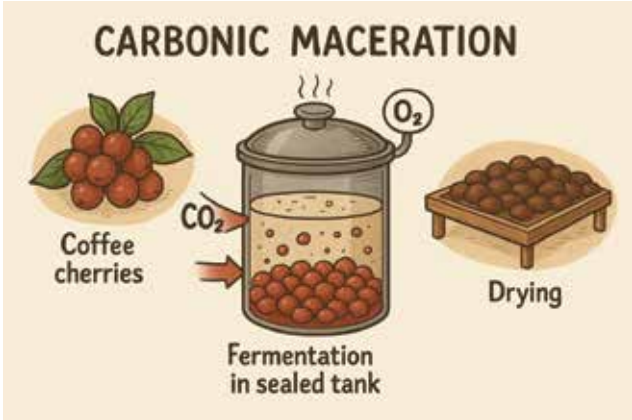

Figure 8: Honey Processing Process

Processing Method	Images	Process	Flavour Profiles
Naturals		• Harvest of the coffee fruit. The harvested fruit is spread out on patios or raised beds, drying tables, or other suitable areas right after picking. • Farmers choose an area that is in full sunlight all day long. In the following weeks, the cherries are turned regularly. After all, only the side exposed to the sun dries out properly. • The turning is important for even drying and to avoid over-fermentation and rotting. The cherries are fully dry after two to six weeks, depending on the country and climate. At that stage, the coffee bean is extracted from the fruit via milling.	Heavier body, More pronounced sweetness and Complex fruity flavours due to the extended contact between the beans and the fruit during drying. full-bodied, fruity cup.

Figure 9: Naturals Processing Process

Anaerobic Fermentation		Anaerobic fermentation involves controlling the fermentation by limiting the exposure of coffee cherries to oxygen. Variations could occur based on factors such as the type of container used for fermentation, Specific conditions and duration. • This process involves complete removal of air during cherry's fermentation. This means sealing the container tightly to prevent oxygen from entering while allowing gases to escape through a designated outlet. • Whether soaking for 72,48 or 24 hours maintaining the seal is essential. Specialised containers are available ensuring that the coffee remains airtight to prevent oxidation.	• Unique intense flavours • Fruit forward notes • Floral aromas • Heightened acidity
------------------------	--	---	---

Figure 10: Anaerobic Fermentation Process

Processing Method	Images	Process	Flavour Profiles
		The coffee is sealed inside of a barrel and filled with water, with a one-way (exit) valve on the top. As the naturally occurring yeast interacts with the sugars of the coffee fruit, carbon dioxide begins to be released and creates pressure. This pressure pushes any remaining air out of the valve on the top.	
Carbonic maceration		Carbonic maceration is a wine making technique. It involves placing whole coffee cherries in a sealed oxygen free environment while introducing carbon dioxide. This process modifies the fermentation conditions and influences the flavour profiles of the beans. Harvesting - Red ripe cherries are carefully selected Preparation - The whole cherries including the seeds are placed in sealed containers which are then filled with carbon dioxide Fermentation - The carbon dioxide creates an anaerobic environment meaning it lacks oxygen. This alters the fermentation as certain microorganisms responsible for traditional fermentation require oxygen to survive. Instead, lactic acid bacteria and yeast play a significant role in the fermentation process Drying - After the desired fermentation period, the coffee cherries are removed from the sealed environment. The beans are then washed, dried and processed further. <i>In carbonic maceration, whole coffee cherries are sealed in airtight tanks, with carbon dioxide pumped in, which forces oxygen out.</i>	Increased fruitiness, acidity and distinct aromatic profiles

A woman with dark skin and curly hair, wearing a white lab coat with a 'COFFEE KENYA' patch, is pouring water from a silver kettle into a row of white coffee cups. The background is a blurred indoor setting, possibly a laboratory or a coffee processing facility. A large yellow abstract shape is on the left side of the image.

COFFEE QUALITY

COFFEE QUALITY

Coffee in Kenya is well known for its rich aromatic complexity, with over 800 distinct fragrant components. Kenyan coffee is grown in well-drained volcanic soils near the equator—around Mt. Kenya, the Aberdare ranges, Mt. Elgon, and the Kisii and Ukambani highlands benefiting from the ideal climatic conditions.

Globally, Kenyan Arabica is renowned for its physical density, long shelf life, vibrant acidity, and intense cup profile. Due to these qualities, it is often used for blending to enhance lower-quality coffees. The combination of volcanic soils, favourable climate, certified coffee varieties, and skilled farming techniques solidifies Kenya's status as a top-tier coffee producer, consistently delivering an unmatched coffee experience. The exceptional quality is as a result of good agricultural practices and good processing practices all of which contribute to the strong reputation of Kenyan coffee in the international market.

Coffee in Kenya is classified into seven standard grades based on density, size and shape and further classified into 10 classes according to the raw, roast, and liquor attributes. Approximately 30% of its production falls into the specialty category, while the rest is categorized into commercial and lower-quality segments.

QUALITY CONTROL OF KENYAN COFFEE

The practice of harvesting uniformly ripe cherries, which are then further sorted and processed the same day, is the first step in quality control for Kenyan coffee.

Different types of parchment, P1, P2, P3, and PL, are generated from primary wet processing based on density. After processing of parchment, green coffee beans are mechanically divided into seven grades during the dry milling process based on attributes that include size, shape, and density. These grades include AA, AB, PB, C, E, TT, and T. Buni is classified into two categories: Buni Heavy (MH) and Buni Light (ML), while the natural coffee is categorized into Natural Heavy (NH) and Natural Light (NL) and Robusta coffee is categorized into Robusta Heavy (RH) and Robusta Light (RL).

Table 13: Grades and their description

No.	Grade	Society
1	AA (Above average)	Beans screen size is 7.2 (approximately 18/64 of an inch) are assigned this grade. This grade attracts higher prices than other grades.
2	AB (Average bean)	They are slightly smaller than AA with screen size of 6.8mm (17/64 inch)
3	PB (Pea Berry beans)	Constitutes about 10% of Kenya Coffee
4	E (Elephant beans)	This category includes large beans and rare in occurrence
5	C	Beans are smaller than AB and PB category
6	TT	Constitute smaller beans and are normally separated from more saleable AA, AB and E grades
7	T	They are smaller grades of beans and mostly are broken pieces
8	Buni (MH, ML)	Unwashed coffee which is usually unpicked from the tree and fall off after ripening. The resulting coffee is generally sour in taste.

COFFEE PROFILES BY COUNTY

Kenyan Coffee is Known for its consistent rich flavor alongside deep, wine-like acidity and pleasant aroma. The coffee beans have distinctly bright taste with complex tones of fruit and berry. The different quality attributes are derived from geographic differentiation resulting in different coffee cup quality attributes attracting different clientele clusters. The summary below provides highlight of coffee flavor profiles from various Coffee growing regions.

- Mt. Kenya Region:** Murang'a and Kiambu counties produce a cup with medium acidity, full body with gripe fruity taste; floral notes
- Nyeri county** produces a cup with complex sweetish flavor, floral, sharp citrus acidity, well balanced body with clear blackcurrant flavor and dark chocolate, strong caramel.
- Kirinyaga county** produces a cup with bright citrus acidity, full body with clear blackcurrant flavor and dark chocolate, strong caramel berries
- Rift Valley:** Nakuru, Baringo and Kericho (Kipkelion) counties, produce a full body cup with Medium acidity, with some fruity overtones.
- Eastern Region:** Meru county produces a full body cup with medium citrus acidity, berry and chocolate flavor;
 - Embu county produces full body cup with bright citrus acidity berries and chocolate flavor
 - Machakos and Makueni counties produce a full body cup with medium acidity, fruity undertones and chocolate flavor with hints of caramel.
- Western Region:** Bungoma county produces a cup with medium acidity and fruity undertones while Trans Nzoia produces a full body cup with mild Citrus acidity.
- Nyanza Region:** Kisii county produces a medium body blue mountain cup of coffee with medium acidity

GROSS MARGIN AND COST OF PRODUCTION

Table 14 below shows cost of production at 3 management levels. The farmer producing at 10 Kgs per tree is at high management level, while the farmer producing at 5 kg is at an average management level and at 2 Kgs per tree is at low management level.

Table 14: Gross margins and cost of production Analysis

Parameters	Improved Varieties				Traditional varieties		
	Ruiru 11		Batian		SL28, SL34, K7		
Farmer category	High	Medium	High	Medium	High	Medium	Low
Yield Cherry by tree (kg/tree)	10	5	10	5	10	5	2
Trees/acre	1,000	1,000	770	770	540	540	540
Yield Cherry (kg/acre)	10,000	5,000	7,700	3,850	5,400	2,700	1,080
Average auction price USD/ 50 Kg bag	227.42	227.42	227.42	227.42	227.42	227.42	227.42
Gross Revenue per Kg in KES	84.5	84.5	84.5	84.5	84.5	84.5	84.5
Cooperatives Costs (20%)	16.9	16.9	16.9	16.9	16.9	16.9	16.9
Cherry price KES/kg	67.6	67.6	67.6	67.6	67.6	67.6	67.6
Gross Revenue (KES/acre)	676,000	338,000	520,520	260,260	365,040	182,520	73,008
Variable Costs							
Fertilizers	131,300	65,650	105,300	52,300	73,244	36,622	22,911
Fertilizer Application	12,210	6,290	10,360	5,000	7,400	5,180	2,775
Weed management	8,250	8,250	8,250	8,250	8,250	8,250	4,700
Fungicides	0	0	0	0	42,379	26,487	10,594

Parameters	Improved Varieties				Traditional varieties		
	Ruiru 11		Batian		SL28, SL34, K7		
Farmer category	High	Medium	High	Medium	High	Medium	Low
Fungicide Application	0	0	0	0	11,280	7,050	2,820
Insecticides	2,100	2,100	2,100	2,100	2,100	2,100	0
Insecticide Application	8,545	8,545	6,580	6,580	4,600	4,600	0
Canopy Management	46,300	46,300	33,270	33,270	17,760	17,760	4,170
Harvesting	71,429	35,714	55,000	38,571	38,571	19,286	7,714
Transport	10,000	5,000	7,700	3,850	5,400	2,700	1,080
Production Cost (KES/acre)	290,134	177,849	228,560	149,921	210,984	130,035	56,764
Management cost	16,900	8,450	13,013	6,507	9,126	4,563	1,825
Total Cost	307,034	186,299	241,573	156,428	220,110	134,598	58,589
Gross Margin (KES/acre)	368,966	151,701	278,947	103,833	144,930	47,922	14,419
Production Cost per Kg (KES)	30.7	37.3	31.4	40.6	40.8	49.9	54.2
Average Price per Kg in KES	67.6	67.6	67.6	67.6	67.6	67.6	67.6
Gross margin KES per Kg	36.9	30.3	36.2	27	26.8	17.7	13.4
Return on Investment per year - %	120.2	81.4	115.5	66.4	65.8	35.6	24.6

The costs of production at high management levels for Ruiru 11 and Batian were approximately KES 31 while the costs for farmers at the medium level production were KES 37 and KES 41 respectively. The cost of production for traditional varieties for high management level was KES 41 and KES 50 for the medium management farmers. The average cost of processing and other cooperative operational costs in the 3 levels were KES 16.9 per Kg. A management cost of 2.5% of the total revenues was charged as the opportunity cost to the farm since the farmer would have engaged in other farm or off farm activities and receive a payment for the same.

The gross margin per acre for Ruiru 11 at the high management level was KES 368,966 and KES 278,947 for Batian. The medium management level gross margins were KES 151,701 for Ruiru 11 and KES 103,833 for Batian respectively. The gross margin per acre at the high management level for traditional varieties was KES 144,930 and KES 47,922 and KES 14,419 for medium management and the low management level respectively.

The gross margin for the traditional varieties (SL 28, SL 34 and K7) was lower compared to the improved varieties and cost of production was higher and this was attributed to the increasing cost of fungicides. Since these varieties are susceptible to Coffee Berry Disease (CBD) and Coffee Leaf Rust (CLR), the farmers have to keep on spraying against these two diseases.

The cost of inputs in 2024 especially fertilizers remained stable with NPK costing about KES 5,000 from KES 6,000 in 2022/23 and CAN KES 3,500 from KES 4,000. The cost of fungicides especially copper based fungicides increased significantly by over 10% margin at about KES 1,700 per kilogram up from KES1,500

The average price per kilogram of cherry to the farmers however rose from KES 58 to KES 67.6

MARKET STRUCTURE AND TRENDS

MARKET STRUCTURE AND TRENDS

The global coffee market is dynamic with evolving taste preferences, processing methods and price fluctuations. For Kenya's coffee industry, the main priorities remain ensuring quality, sustainability, and a stable supply. The increasing emphasis on traceability and transparency in the value chain, coupled with the growth of digital marketplaces, is facilitating direct trade between local Kenyan producers and international buyers. The re-invention of the direct sales process to be a grower focused entity has led to improved price discoveries as well as increased know how on trade related matters among growers. Globally, multinational companies dominate coffee trading and roasting, further consolidating the market and exerting pressure on prices across the supply chain.

There are two systems of marketing coffee in Kenya. These are the auction system and the direct sales system. The Direct Sale is where an agreement between a grower miller and a buyer based outside the country is entered for the sale of coffee at prices not lower than the prices of the same grade and quality prevailing at the NCE at that time. About 30% of Kenyan coffee is traded through the direct sales. Direct Sales in the 2023/2024 season and for consequent seasons have mainly been more grower-centric with more growers learning the export processes. Direct sales are guided by guidelines as stipulated in the Crops (Coffee) (General) Regulations, 2019.

DIRECT SALES GUIDELINES

As per the sixth schedule of The Crops (Coffee) (General) Regulations, 2019, the minimum requirement for undertaking a direct sale is a grower's pulping station license issued by the respective county government. A grower or a grower miller who has secured an overseas Buyer for the coffee, shall:

1. Store coffee for direct sales at designated warehouses.
2. Enter into a direct sales contract in the format prescribed under these guidelines and shall lodge the contract with the Authority for registration and approval.
3. Submit to the Authority a sample of 250gm of the said coffee for quality analysis and for arbitration purposes.
4. Have the coffee inspected by the Authority, in order to ascertain the quality, quantity and the value and for approval of the contract.
5. Be issued with an inspection certificate for every coffee consignment declared to the Authority for direct sales to ascertain the coffee quality. The inspection certificate shall be one of the requirements for clearance of direct sales exports.
6. The Authority liquorer shall conduct quality analysis and assess the price offered, undertake price comparisons with the prices prevailing at the exchange for coffees of the same quality and grade and keep the growers accordingly informed.
7. The direct sales price offered shall not be in any case lower than the exchange prevailing prices.
8. Ensure the overseas buyer remits full payment before shipment is undertaken.
9. Apply to the Authority for:
 - (a) export clearance;
 - (b) ICO certificate;
 - (c) KEPHIS certification;

-
- (d) Movement permits
 - (e) Quality certificate; and
 - (f) Any other necessary clearance
10. Appoint an agent for purposes of logistics and other processing requirements related to coffee exports where applicable.
11. Remit monthly returns to the Authority on Direct sales undertake

DOMESTIC COFFEE CONSUMPTION

Kenyan coffee consumption has been on the uptrend year on year growing with a 10-year annual growth rate of 3.8% from 1% in 2014/2015 to 4.17% of the total national production in 2023/2024. In the 2023/2024 coffee year, the domestic consumption grew by 0.73% as compared to the 2022/2023 coffee year from 2,051 MT to 2,062 MT. Figure 11 shows the ten-year trend in domestic coffee consumption.

COFFEE CONSUMPTION CONSUMPTION (MT) - 10 YEARS

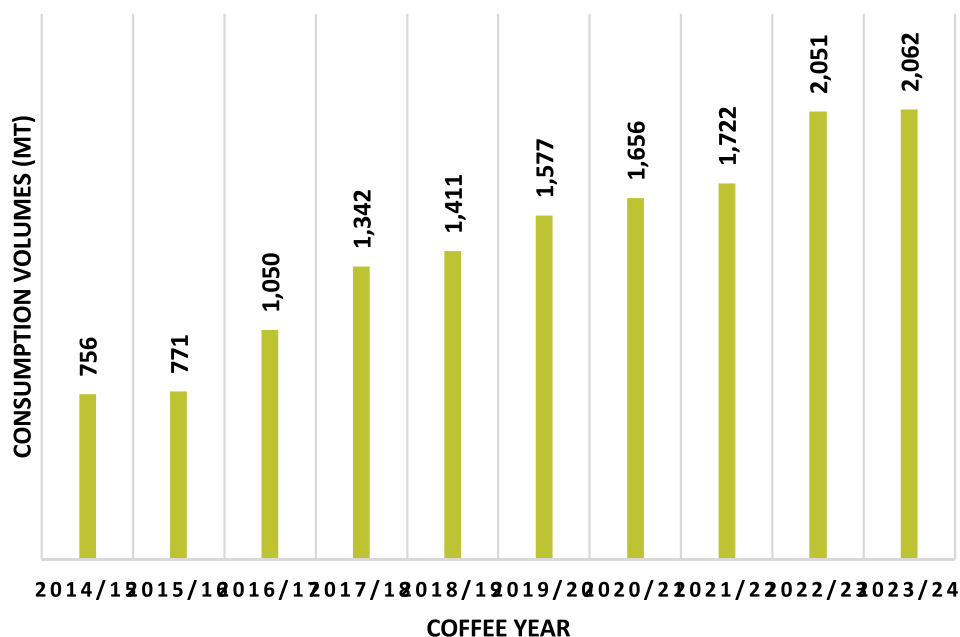

Figure 11: Coffee Consumption (MT) - 2014/2015 – 2023/2024

This continuous growth in coffee consumption is mainly driven by a growing youth with a keen interest in exploring the world around coffee. This desire has been driven by continuous domestic coffee consumption campaigns carried out by the Coffee Directorate and coffee stakeholders alike.

NUMBER OF COFFEE HOUSES

The increasing number of stakeholders engaging in value addition has occasioned an increased number of coffee consumption outlets, this is due to steady supply of processed coffee.

The number of coffee outlets increased from 231 in 2019 to 757 in 2022. Coffee shops and big hotels are the main drivers of the domestic consumption in cities and major towns such as Nairobi, Mombasa, Kisumu, Nakuru and Eldoret.

Accordingly, the 2019 KPHC Volume II Report shows that Kenya's population was 47.6 million people. The domestic survey established that in season 2023/2024, consumption was 2.06 million kilograms therefore the Per Capita Coffee Consumption for Kenya is currently at 0.04 Kg per person.

AUCTION PERFORMANCE 2023/2024 COFFEE YEAR

AUCTION PERFORMANCE 2023/2024 COFFEE YEAR

In the recently ended 2023/2024 coffee year, the volumes of coffee sold at the auction have been the highest in the last 10 years. In comparison to 2022/2023, the volumes have increased by 27% from 32,652 MT to 41,617 MT as shown in Figure 12 below.

AUCTION VOLUMES (MT) AND VALUE (MILLION USD) - 10 YEARS

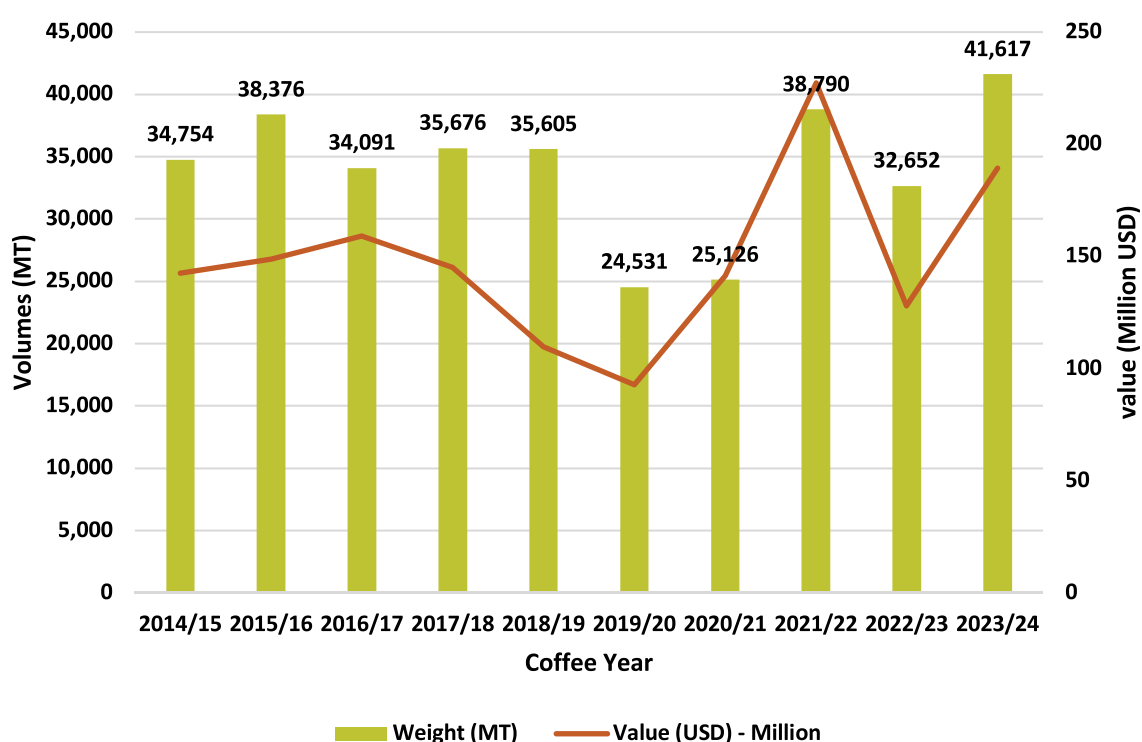

Figure 12: Auction Volumes (MT) and Values (Million USD) - 2014/2015 – 2023/2024

As shown on Table 15 below, the value recorded in the auction also increased by 48% as compared to the previous season that is from USD 127.86 million to USD 189.29 million. This increase in value recorded aligns itself with the high futures prices in the international market which has been transmitted into the Kenyan market.

Table 15: Auction Performance for the years 2022/2023 and 2023/2024

Coffee Year	2022/2023	2023/2024	% Change
Bags Sold	531,210	676,903	27%
Weight Sold (Kgs)	32,651,992	41,616,589	27%
Minimum Price (USD)	34	50	47%
Maximum Price (USD)	686	650	-5%
Value (USD)	127,861,762.74	189,285,383.02	48%
Average Price USD/50Kg	195.79	227.42	16%

The bags sold, weight sold, value, average price and minimum price recorded an increase ranging between 15% and 50% while the maximum price recorded a drop by 5%. The increase in the average auction price and value were as a result of high global coffee prices against high international demand and a consistent increase in production.

AUCTION PERFORMANCE BY MONTH

In the 2023/2024 coffee year, trading took place in all 12 months of the coffee year as compared to 10 in the previous coffee year where there was a break due to the actualization of the Crops (Coffee) (General) Regulations, 2019. The highest volumes and value recorded was in the month of April totaling of 6,879 MT and USD 34.23 million respectively while the lowest volumes were recorded in July totaling 940 MT and a corresponding value of USD 3.8 million as shown in Table 16

Table 16: Auction Performance by Month

Month	Bags Sold	Weight Sold(Kgs)	Min Price(\$)	Max Price(\$)	Value(\$)	Average Price USD/50Kg
Oct-23	22,936	1,418,684	62	342	5,655,951.68	199.34
Nov-23	27,274	1,677,096	85	337	6,176,628.74	184.15
Dec-23	49,526	3,035,088	72	550	11,584,989.68	190.85
Jan-24	74,476	4,552,501	67	470	19,493,137.84	214.09
Feb-24	78,579	4,821,266	59	600	24,548,918.56	254.59
Mar-24	75,266	4,627,034	70	650	22,913,580.74	247.61
Apr-24	112,087	6,878,663	107	500	34,231,874.30	248.83
May-24	56,296	3,462,376	80	480	13,760,742.98	198.72
Jun-24	73,418	4,521,878	50	540	19,565,750.92	216.35
Jul-24	15,113	939,892	73	326	3,785,883.54	201.40
Aug-24	49,156	3,033,546	70	392	14,556,012.48	239.92
Sep-24	42,776	2,648,565	68	400	13,011,911.56	245.64
Total	676,903	41,616,589	50	650	189,285,383.02	227.42

In terms of value per 50 Kg, the highest average price per grade was recorded in the month of February where the price was 254.59 USD/50Kg while the lowest price was recorded in the month of November at a low of 184.15 USD/50 Kg.

GRADE DISTRIBUTION IN THE AUCTION

Grade AB had the highest volumes traded at the auction during the year under review accounting for 38% of the total volumes. The main coffee grades accounted for 84.85% of the total volumes in the auction while the miscellaneous coffee grades accounted for 7.51% and unwashed coffee grades accounted for 7.64% as shown in Table 17

Table 17: Grade Distribution in the Auction – 2023/2024

Grade Classification	Grade	Bags sold	Weight sold (Kg)	Min Price (USD)	Max Price (USD)	Total Value (USD)	Average Price(USD)	% Share
Main Coffee Grades	AA	123,776	7,592,311	110.00	650.00	44,925,356.02	295.86	18.24%
	AB	260,221	15,842,478	105.00	550.00	76,358,793.18	240.99	38.07%

The combined market share of the top 5 buyers was 78% while the other 53 buyers had a combined market share of 22%. The top 20 buyers had a market share of 98.74% while the other 38 buyers had a combined market share of 1.26% as shown in Table 19.

DIRECT SALES 2023/2024 COFFEE YEAR

DIRECT SALES 2023/2024 COFFEE YEAR

Direct Sales in the 2023/2024 coffee year were mainly grower-centric as stipulated in the regulations. Licensing of Coffee Agents kicked off in July 2024 whose main obligation in Direct Sales is to facilitate the export logistics for growers.

Direct sales in the 2023/2024 season recorded an average price of USD 305.78 against a total volume of 6,583.42MT and a total value of USD 40.26 million. The average price recorded was 12% higher as compared to the average price recorded in 2022/2023. The highest average price recorded for Direct Sales coffee in the 2023/2024 season was USD 1,075.71 per 50 Kg for grade AA which was 69% higher as compared to the average price for the same grade recorded in the 2022/2023 season.

Figure 13 highlights the performance of Direct Sales over a ten-year period. Direct sales volumes were highest in the 2019/2020 season where the volumes hit a high of 13,521 MT.

DIRECT SALES VOLUMES (MT) AND VALUE (MILLION USD)

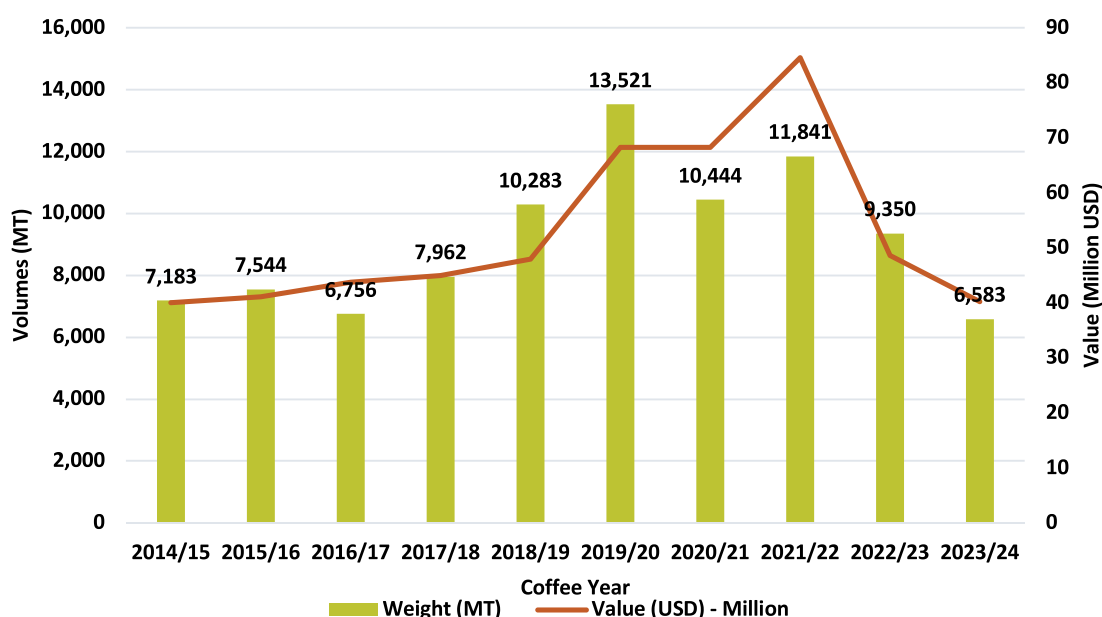

Figure 13: Direct Sales Volumes and Value 2014/2015 – 2023/2024

The drop in volumes during the year 2022/2023 was attributable to the operationalization of the Crops (Coffee) (General) Regulations 2019 which did away with the marketing agents and replaced the Coffee Regulations 2012. The transition period led to three months without any direct sales being conducted.

During the 2023/2024 coffee year, of the 2022/2023 season, growers were acquainting themselves with the direct sales process. The licensing of Coffee Agents has also eased the logistical burden borne by the farmers and led to an increase in the number of direct sales as well as grower sensitizations done by the Directorate which led to increased understanding of the process by growers.

DIRECT SALES DISTRIBUTION BY GRADE

A total of 21 grades were exported as direct sale coffee in the 2023/2024 coffee year. The grade with the highest volumes exported was grade AB with a share of 42% as shown on Table 20.

Table 20: Direct Sales Distribution by Grade

Grade Classification	Grade	Bags sold	Weight sold (Kg)	Total Value (USD)	Average Price(USD)	% Share
Main Coffee Grades	AA	30,954	1,857,223.42	14,016,838.53	377.36	28.21%

Unwashed Coffee Grades Sub-Total		3,840.38	230,423.04	1,555,742.14	337.58	3.50%
Grand Total		109,723.69	6,583,421.32	40,261,111.35	305.78	100.00%

The demand for specialty coffee continues to rise each year. These specially prepared coffees tend to fetch higher prices as compared to washed coffees. The highest average prices were recorded during test sales for infusions, naturals, anaerobic and honey processed coffees. NH-Mango Infusion and Natural Anaerobic coffees were sold at USD 555.06 and USD 504.60 per 50kg.

DIRECT SALES DESTINATIONS

The top 3 destinations for direct sales coffee in the 2023/2024 coffee year by volumes were United Kingdom (66.94%), Switzerland (14.23%) and USA (7.32%) as shown in Table 21.

Table 21: Direct Sales Destinations

No.	Destination	Volumes (MT)	Value (Million USD)	Value (Million USD)	Share
1	United Kingdom	4,407.09	26.37	299.16	66.94%
2	Switzerland	936.79	5.13	274.06	14.23%
3	USA	481.72	2.80	290.99	7.32%

2023/24	41,617.00	6,583.00	189.29	40.26	227.42	305.78	48,200.00	229.55	238.12

The combined performance of both the auction and direct sales during the year under review recorded an increase in volumes and value as compared to 2022/2023. The combined volumes and values increased by 11% and 23% respectively despite a drop in direct sales volumes and value.

Figure 14 shows the trend in prices for the auction and direct sales with the prices highlighted on the graph highlight the average prices recorded for the 2023/2024 coffee year. The weighted 10-year average prices for Auction, Direct Sales and the combined auction and Direct Sales average were 217.44 USD/50Kg, 289.61 USD/50 Kg and 232.89 USD/50 Kg respectively. Over the last 10 years the average direct sale prices have been higher than the overall average auction price by USD 72.18 per 50 Kg while the auction price was lower than the combined average price for both the auction and direct sales by USD 15.45.

AVERAGE AUCTION AND DIRECT SALES PRICES - USD/50Kg (10 YEAR TREND)

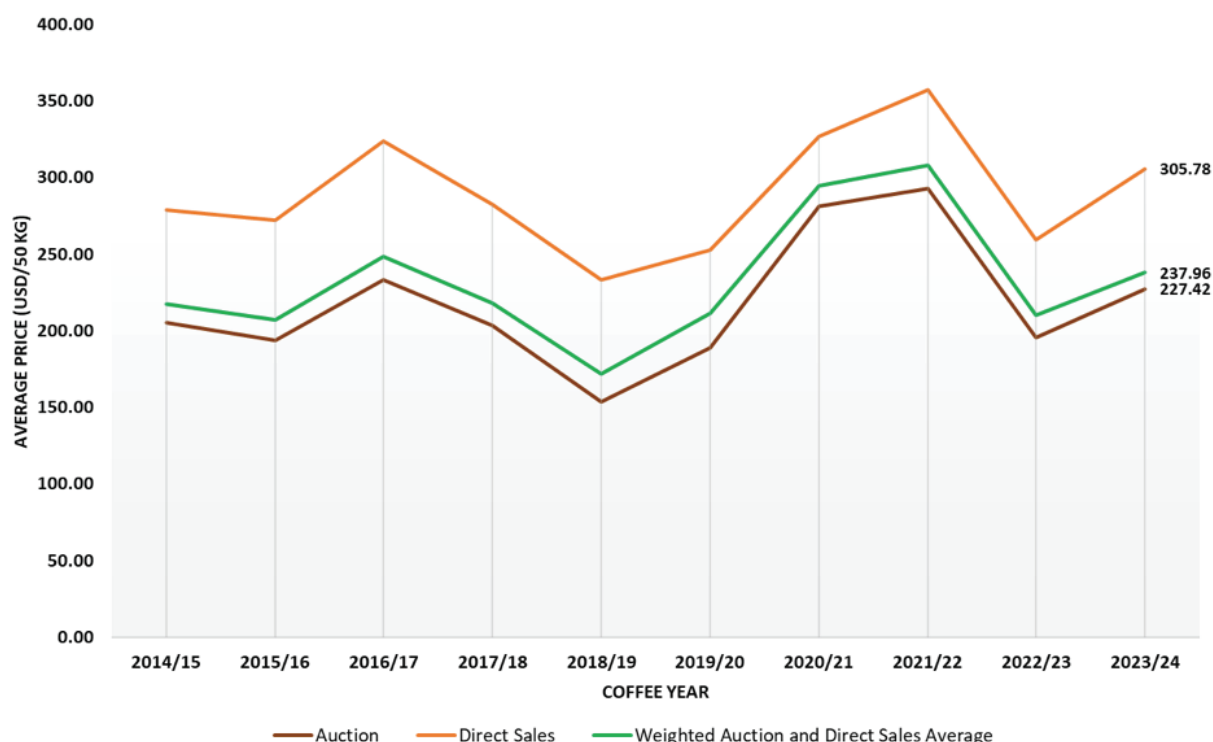

Figure 14: Trend of Auction and Direct Sales Average Prices - USD/50Kg 2014/2015 – 2023/2024

In the 2023/2024 coffee year as shown in Figure 14, growers that solely sold their coffee through the auction (USD 227.42) forewent USD 10.70 as compared to growers who undertook both auction and direct sales (USD 237.96). However, growers who purely engaged in direct sales (USD 305.78) realized significantly higher prices by a margin of USD 78.36 as compared to growers who sold their coffee through the auction only and USD 67.66 higher as compared to growers who sold their coffee through the auction and direct sales combined.

Overall, the Direct Sales prices were 34% higher as compared to the auction prices and 29% higher as compared to the auction and direct sales average.

COMBINED AUCTION AND DIRECT SALES GRADE DISTRIBUTION

Grade AB had the highest volume with a share of 39% of the total volumes traded for both auction and direct sales during the year under review. The grades that had the least traded volumes of less than 1% were mainly under the miscellaneous and unwashed coffee and grade E in the main coffee grades. However, grades UG1 under miscellaneous grade classification and MH under the unwashed grade classification had volumes more than 4% traded.

The background of the page is a close-up photograph of several stacked coffee sacks made of burlap. The sacks are tied with twine and show signs of wear. A large, vibrant green abstract shape, resembling a stylized 'C' or a coffee bean, is overlaid on the left side of the image. The title text is centered within this green area.

COFFEE EXPORTS BY DESTINATION, VOLUME AND VALUE 2023/2024

COFFEE EXPORTS BY DESTINATION, VOLUME AND VALUE 2023/2024

In the coffee year 2023/2024, a total of 59 traders including farmers exported their coffee amounting to 819,983 60-Kg bags with a corresponding volume of 49,199 MT GBE which was 3% higher as compared to 47,957 MT recorded in the 2022/2023 coffee year.

EXPORT VOLUMES AND VALUE TRENDS

Figure 15 shows the overall trend of export volumes across a ten-year period from the Coffee year 2014/2015 to 2023/2024. Export volumes in the 2023/2024 coffee year was 49,199 MT which was 3% higher than 2022/2023 coffee year's volumes.

EXPORT VOLUMES (MT) AND VALUES (MILLION USD) - 10 YEARS

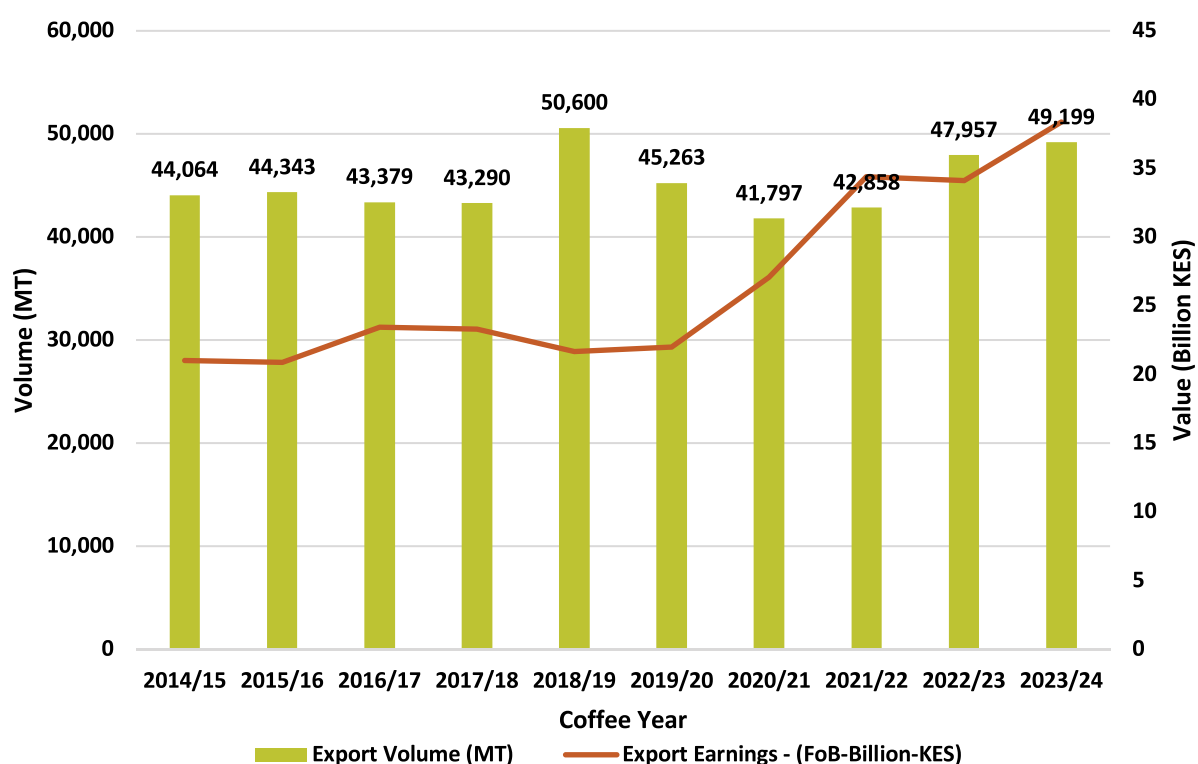

Figure 15: Coffee Exports in MT 2014/2015 – 2023/2024

Table 24 illustrates that the export earnings increased by 16% from USD 251.86 million to USD 292.88 in 2022/23 and 2023/24 respectively. The value of exports in Kenyan shillings was 39.95 billion Kenyan shillings which indicated an increase compared to KESs 34.07 billion recorded in the 2022/23 season.

Table 24: Export earnings from 2014/2015 to 2023/2024

Coffee Year	Export Earnings (Million USD)	Export Earnings (KES Billion)
2014/15	223.35	21.01
2015/16	205.67	20.89
2016/17	227.83	23.47
2017/18	229.51	23.31
2018/19	213.22	21.68
2019/20	209.82	22.02
2020/21	292.26	27.07
2021/22	298.56	34.37
2022/23	251.86	34.07
2023/24	292.88	39.95

EXPORT DESTINATION BY VOLUME AND VALUE

In the coffee year 2023/2024 a total of 59 destinations imported coffee from Kenya which was 7 more than the previous season where exports were to 52 destinations. The top 3 export destinations for Kenyan coffee in the 2023/2024 coffee year were Belgium (17%), USA (16%) and Germany (11%) as shown in Table 25. The increase in volumes exported to Belgium is attributed to market campaigns done by Agriculture and Food Authority and the Ministry of Foreign and Diaspora Affairs.

Table 25: Top 10 Export Destination for 2022/2023 and 2023/2024

No.	Export Destination	2022/2023				2023/2024			
		Weight (MT)	Value (Million \$)	Value (Billion KES)	% Share	Weight (MT)	Value (Million \$)	Value (Billion KES)	% Share

Emerging markets for Kenyan coffee during the year under review include North and East African Countries, Canada and Middle East countries.

EXPORT PERFORMANCE BY REGIONS/BLOCS

56% of Kenyan coffee was exported to the European market during the year of reporting as shown in Table 26 maintaining a share of above 55% over the years. Exports to Asia in 2023/2024 grew by 1% as compared to the 2022/2023 coffee year. The highest average prices per 60-Kg bag were from exports to Europe, Asia and Australia with average prices of USD 369.15, USD 362.57 and USD 353.99 respectively.

Table 26: Export performance by Regions/Blocs 2023/2024

Region/Continent	Weight (MT)	Value (Million USD)	Avg Price (USD/60Kg)	Share
Europe	27,363.06	168.35	369.15	55.62%
North America	10,212.52	55.52	326.20	20.76%

Grand Total	49,199.09	292.88	357.18	100.00%

The European Union Deforestation-Free Regulation (EUDR) was initially scheduled to take effect on 1st January 2025; however, the deadline has since been extended to 1st January 2026. During the 2023/2024 coffee year, various efforts were undertaken by the industry to ensure compliance with the regulation. The government established a multi-agency team to spearhead its implementation, while the private sector actively participated in the geo-referencing of grower farms. The implementation process is ongoing, driven by continuous stakeholder engagement. The impact of the EUDR on coffee market performance is expected to be felt once the regulation comes into force in 2026.

EXPORT MARKET SHARE BY TRADERS

In the period under review, a total of 92 traders exported coffee representing an increase of 46% compared to 63 in the previous year. C Dorman SEZ Limited had the highest export volumes with a share of 18% followed by Ibero (Kenya) Ltd (16%), Kenyacof Limited (12%), Taylor Winch (Coffee) Ltd (8%) and Louis Dreyfus Company Kenya Limited (8%) as shown in Table 27.

The export players during the 2023/24 coffee year, included coffee growers who did direct sales as compared to the previous years where the main players were predominantly Buyers.

Table 27: Top 25 Exporters 2023/2024 Coffee Year

No.	Exporter	Volume (GBE) - MT	Value (Million \$)	% Share
1	C Dorman SEZ Limited	9,048.38	57.69	18%

COFFEE EXPORTS BY FORM

Kenya has over the years been a net exporter of green coffee and as is evident in Table 28. During the period under review, 97% of Kenya's coffee exports were in green coffee form while 3% were in processed form (Roasted and Soluble). Processed coffee exports increased by 34% in 2023/2024 compared to 2022/2023 from 1,464 MT to 1,961 MT.

Table 28: Coffee Exports by form 2023/2024

Form	Weight (MT)	Value (Million \$)	% Share
Green Coffee	47,238	277.70	96.01%
Processed Coffee	1,961	15.18	3.99%
Grand Total	49,199	292.88	100%

Over the last ten-year period, Kenya's green coffee exports have steadily been above 40,000 MT which has accounted for between 97% - 99% of the coffee exports while those of processed coffee have maintained an average of less than 50 MT up until the year 2018/2019 as shown in Figure 16. Since 2019/2020, there has been a steady growth in the processed coffee exports with more exporters working towards value addition before export.

EXPORTS OF COFFEE BY FORM - 10 YEARS

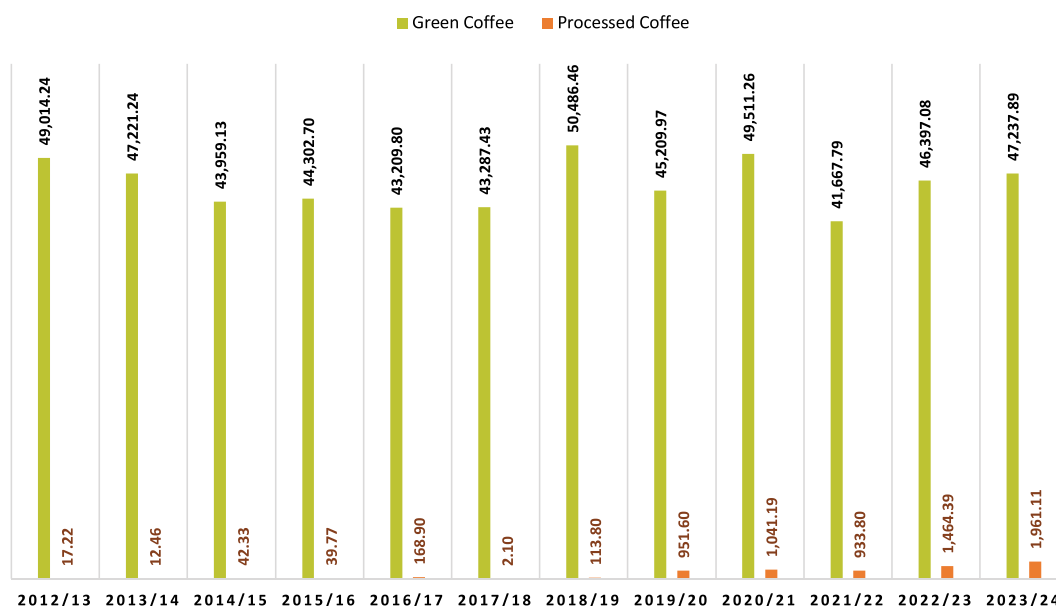

Figure 16: Coffee Exports by form 2014/2015 – 2023/2024

TREND OF PROCESSED COFFEE EXPORTS

The exports of processed coffee have hit the 900 MT mark in 2019/2020 and has continued to rise. The trend as observed in Figure 17 has always been positive indicating growth in exports of processed coffee. Exports of value-added coffee peaked at 1,961.11 MT representing 4% of the total coffee exports in the 2023/2024 coffee year.

The increase in processing aligns with the BeTA and the Vision 2030 which emphasize on value addition in agriculture. Kenya stands to earn higher foreign exchange as value added coffee earns more per kg as compared to green coffee.

TREND OF PROCESSED COFFEE EXPORTS - 10 YEARS

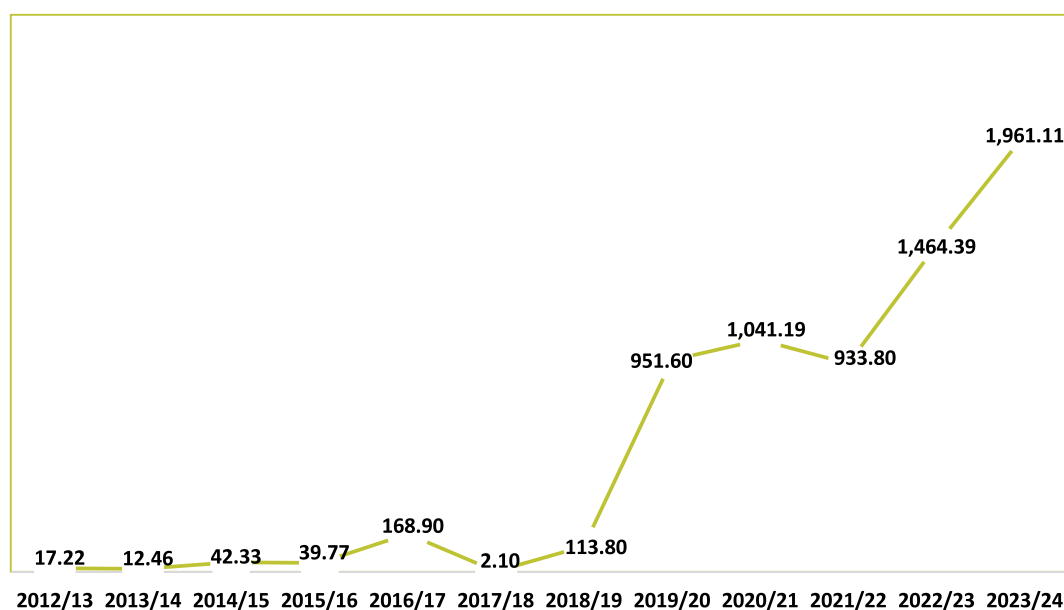

Figure 17: Processed Coffee Exports Trend 2014/2015 – 2023/2024

COFFEE IMPORTS 2023/2024

COFFEE IMPORTS – 2023/2024

Coffee imports in the 2023/2024 coffee year amounted to 1,770 MT which represents an increase in volumes imported by 28% as compared to the previous year. Table 29 shows the breakdown of coffee imports by form. 90% of imports were in green form while 10% were in processed form during the year under review.

Table 29: Coffee Imports by form 2023/2024

Coffee Type	Coffee Form	Volumes (Kgs)	Value (USD)	% Share
Green Coffee	Coffee Not Roasted, Not Decaffeinated	1,570,553.80	6,923,479.43	89.82

Total		1,770,257.99	9,568,546.75	100.00%

IMPORTS OF COFFEE BY FORM AND ORIGIN

Most of the coffees imported in green form were organically produced to cater for markets that sought for organic coffee since the level of organic coffee production in Kenya is still low. Table 30 shows the origins for Kenya's imports for the year 2023/2024. 89% of the imported coffee were neither roasted or decaffeinated and 1% was decaffeinated but not roasted. The rest of the imported coffee (10%) was in processed form (Roasted and Soluble).

Table 30: Imports of Coffee by Form and Origin for the year 2023/2024

Coffee Type	Origin Country	Volumes - GBE (Kgs)	Value (USD)	Avg Price (USD/50 Kg)	% Share

Total		1,770,257.99	9,568,546.75	270.26	100.00%

The cost of imported processed coffee was higher. Decaffeinated and roasted coffee fetched an average price of 2,428.41 USD/50 Kg while extracts had an average price of 375.14 USD/50 Kg as compared to the average price of green non-decaffeinated coffee which had an average price of 220.41 USD/50 Kg. Overall, the average price for imports was 270.26 USD/50 Kg as shown in Table 30.

IMPORTS OF COFFEE MAKERS AND ESPRESSO MACHINES

In the 2023/2024 coffee year, Kenya imported a total of 17,690 units of coffee makers with a corresponding value of KES 73.69 million. There were imports from a total of 40 countries with the top 3 countries being China (86%), United Arab Emirates (5%) and Italy (3%) that accounted for 94% of the total coffee makers imports.

Table 31: Import of Coffee Makers
